Importance: High

Hi Darcy – I don't know where the "RA 103119" paper that Carl sent came from. If updates are needed, maybe Steve Merritt can help. Maybe he drafted it.

Hi Darcy – Here is what Carl sent to me last week after his weekly call with Greg and Jag on Thursday regarding radiation.

I talked to Greg and Jag about our role on Subpart W and B. This attached version of the WMA agenda goes into more detail on WMA's issues with Subpart W and B. I think it is an ORIA issue not a regional one and that is what I think I explained to Jag. I also told Jag that WY is not delegated for Subpart W or B, so EPA issues the ISR approvals.

Attached, please find the agenda Jag received yesterday for the WMA meeting next week. He didn't provide it to anyone but me (Carl got it after he heard about it and asked for it), and did clarify today that his expectation is that I lead the assembly of the briefing/background paper/talkers. Apologize for the late notice.

I would appreciate it if you could look at the agenda items and provide materials response to areas within your office. Mark – perhaps none of this is yours – wasn't sure on the removal of contaminated soils.

I'd appreciate your information by COB on Monday. I'm also attaching the paper we put together for last October's meeting – since the agenda is basically the same, you may be able to pull from this.

Let me know if you have questions.

Thanks!
D

Hi Darcy,

The agenda item seems to be very similar to the one I saw late last year from WMA. Please note that the meeting was on the second day after I started and I may have missed something. Are there briefing papers for these issues that will provide Greg and I some backgrounds, issues and challenges?
